

Ping drivers including the new G20, i15, i20, Ladies Faith & Rapture V2.

#### *Products Under Ping Driver*

##### [1. Ping Faith Driver](#)

Designed to meet the needs of women golfers, the Faith driver, offered in 12° and 14° lofts, is engineered to help those with slower swing speeds hit it longer and straighter off the tee.

##### [2. Ping G15 Driver](#)

The G15 driver is engineered for golfers seeking a maximum forgiveness driver that delivers distance and accuracy.

##### [3. Ping G20 Driver](#)

Distance and accuracy are optimized by an external weight that optimizes the center of gravity position to generate high launch and low spin. The G20's large, variable-thickness face generates faster ball speeds and increases MOI for maximum forgiveness.

##### [4. Ping i15 Driver](#)

The fade-biased design of the i15 driver meets the needs of golfers who place high priority on working their tee shots.

##### [5. Ping i20 Driver](#)

Available mid February. Aeronamic for distance, the crown is engineered to reduce drag for maximising clubhead speed & ball velocity, resulting in greater distance in this i20 driver.

##### [6. Ping K15 Driver](#)

With the K15 you'll drive the ball straighter, assisted by a PING innovation called Straight Flight Technology (SF Tec).
